E-mail your electronic flyers as an attachment to webmaster@ArizMasons.org or fax a hard copy to (520) 844-4445 for publication.

If your event is not listed it because no one has told us about it and we are not quite clairvoyant. Look at our master calendar at <http://my.calendar.net/MandWAssc> to see if we know about your next event. Archived issues of this newsletter can now be viewed at <http://arizmasons.org/TheDailySpam.htm>. You can also unsubscribe at that site.

Masonic Trivia and Education

We need Masons and their families to man the phone banks during KUAT's annual fundraiser. This is a great way to support Public Television and for Masons to get involved in the community. There are three shifts of five people needed, as mentioned above. Who knows you may get yourself on TV but no promises. Please call WB Henry Spomer at his cell phone 661-2021 as soon as possible. Some other organizations pulled out at the last minute and we need Masons to step up to the plate now.

"3 TIMES 3' - In ancient times the Entered Apprentice Degree was alone prevalent amongst the generality of our Lodges; for no Brothers could be passed and raised except in the Grand Lodge, and few availed themselves of the privilege. Hence they had only one sign, one token, and one word, and these three constituted the honors. But the members of the Grand Lodge had three signs, three tokens, and three words, and therefore, three times three were appropriately termed the Grand Honors." Source: September 1974 Bulletin of the Masonic Relief Association of the U.S. and Canada

Thought for the day: Love many things – 8,789 Words of Wisdom by Barbara Ann Kipfer

Quote of the Day: “Behold the turtle. He makes progress only when he sticks his neck out.” - James Bryant Conant

Puzzle: (Yesterday: Seven people sent in an answer and five of them got it right: Richard Miller, Roy Otterholt, Jim Hewitt, Brian Pilz, and Tim Davis. If each boy in the family has at least 5 brothers, then the smallest number of boys is 6. Similarly, if each girl in the family has at least 4 sisters, then the smallest number of girls is 5. Thus, the smallest number of children the family might have is 11.)

Ann purchased a house for \$ 205434. She wants to sell it for a profit of exactly 15%. However, she does not want to sell it herself. She wants a Real Estate Agent to sell it for her. The Agent must make a commission of exactly 5.5% (in addition to Ann's 15% profit). How much must the Agent sell the house for? Give your answer to the nearest dollar.
